- Wrote user documentation

Vancouver, BC
Feb. 2019 to Mar. 2019

TalentMarketplace

Volunteer Web Developer

TalentMarketplace is an online, project professional recruitment platform.

- Tech stack: **Django, React, Redux, PostgreSQL**
- Utilized **Git source control** through Bitbucket repository to pull, branch, push code and create pull requests
- Managed ticket progress through backlog in an **Agile** sprint development environment
- Robustly **resolved bugs and implemented features** on an existing, enterprise code base to quickly deliver system enhancements that **reached thousands of users**
- Thoroughly **QAed (white box tested)** all code to have a ticket return rate of 0%

Vancouver, BC
Oct. 2018 to Feb. 2019

Wallonia-Brussels Federation

Controller of Commitments

The French-speaking Community / Wallonia-Brussels Federation exercises its competencies in the French language region of Belgium and in regard to the institutions that fall under its purview in the bilingual Brussels-Capital Region.

- Effective **task prioritization** to meet tight deadlines under pressure
- Worked as part of a **team of 4 controllers** to control subsidies and public contracts for the whole Federation
- Implemented **unique procedure** for different functional departments to harmonize control operations
- **Guided** accountants for their budget requirements
- **Inspected** public contracts and subsidies before charging the budget for a total of 8 billion euros per year

Brussels (Belgium)
July 2012 to June 2018

Latest Projects

Many-Faced God

Group project from Lighthouse Labs' Alumni Lab. A full stack web app built with React and Express. Upload a photo, detect all the faces and swap the faces of the people you don't know with AI generated ones.

Aug. 2019 to Current

Spotify-Lyrics

A full stack web app built with **React, Redux and Express**. It connects to the Spotify API and to API Seeds Lyrics to automatically get the information and the lyrics of the track currently being played on the user's Spotify account.

Apr. 2019 to May 2019

Tinee

URL shortener built with **Mongo, Express, React** and **Node**. The basic functionality of shortening links and copying them is available to unauthenticated users. Logged-in users have their shortened links automatically saved.

Nov. 2018 to Dec. 2018

InForm

Full stack web app built with **Node, Express, PostgreSQL** and **React**, InForm is a Form Building and Document Management system for trades companies. Users can build customised forms for staff to fill out, and once they've been submitted, Foremen and Managers can easily access those forms and stay up to date.

Sept. 2018 to Oct. 2018
